

NANDHITHA R

Full Stack Developer

Bangalore, 560059 | nandhitharamesh10@gmail.com | 8838984540 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive, secure, scalable web applications using React.js, TypeScript, Node.js, Express.js, Python, and PostgreSQL. Delivers REST API-driven, database-backed platforms end-to-end — authentication, marketplace-style e-commerce/checkout flows, payment gateway integration, WhatsApp/SMS/email notifications, and admin dashboards. Strong foundation in cloud infrastructure (Azure), CI/CD automation, and Agile teams; pursuing Generative AI specialization (MCA).

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite, Flutter, Dart, Reflex

Backend: Node.js, Express.js, Python, REST API Development & Integration, JWT Authentication, CRUD Operations, Payment Gateway Integration, WhatsApp/SMS/Email Integration

Databases: PostgreSQL, SQLite, Oracle SQL, Database Design & Normalization

Cloud & DevOps: Microsoft Azure, Docker, Git, GitHub Actions, CI/CD Pipelines, Linux Fundamentals

Tools & Methodologies: Git, GitHub, VS Code, Jira, Confluence, Agile, Scrum

PROFESSIONAL EXPERIENCE

Engineer – Cloud & Infrastructure Management, LTM Ltd, Bangalore, Karnataka *May 2025 – Present*

- Diagnosed recurring infrastructure and application issues using Root Cause Analysis (RCA) and cross-functional incident investigation, improving service reliability while meeting operational SLAs within Agile support workflows.
- Documented technical workflows and operational procedures, streamlining knowledge sharing and incident resolution across teams.

Full Stack Developer – Organic Fresh Store (Client Project, Ilai Foods) *Freelance Project*

- Built a full-stack e-commerce marketplace-style web application using React.js, Vite, Express.js, and SQLite, enabling customers to browse and purchase organic products including sprouts and mushrooms.
- Integrated a payment gateway to enable secure online checkout and order payments for customers.
- Implemented WhatsApp, SMS, and email integrations for order confirmations and customer notifications, improving communication and order tracking.
- Established secure authentication with JWT and bcrypt, protecting both customer and administrative access.
- Delivered 6 end-to-end customer-facing features — product catalog, category filtering, flash deals, shopping cart, guest checkout, and review submission — for an intuitive shopping and checkout experience.
- Created an admin dashboard covering 3 core modules (products, orders, promotional deals) with full CRUD operations for efficient catalog and order management.
- Applied Git for version control and engineered a responsive, mobile-optimized UI across the full application.

Web Developer Intern, ELGI Equipments, Coimbatore, Tamil Nadu *Jul 2023 – Sep 2023*

- Engineered Air Solve, a browser-based troubleshooting application (HTML, CSS, JavaScript) with a 5-stage fault-diagnosis workflow (products, symptoms, checkpoints, root causes, solutions), enabling field engineers to independently diagnose air compressor faults.
- Built 3 engineering calculators (pressure drop, ACFM, energy-saving) and replaced a mobile-app-based support system with a browser-accessible solution, improving accessibility for field engineers and customers.

PROJECTS

NeuroNest Kids – Adaptive Learning Platform

React.js, TypeScript, Express.js, PostgreSQL

- Designed a full-stack adaptive learning platform spanning 3 core capabilities — secure user authentication, REST API-based backend services, and a parent analytics dashboard for tracking student progress.
- Configured Docker-based deployment with GitHub Actions CI/CD pipelines to automate releases.

Blood Donation System – Database Design Case Study

Oracle SQL, ER Modeling, Normalization

- Modeled a 3-entity relational database architecture connecting blood donors, hospitals, and recipients, applying ER modeling and normalization (1NF–3NF) to improve data consistency and reduce redundancy.
- Authored DDL/DML operations and complex SQL queries (joins, subqueries, aggregate functions, set operations) to support donor-recipient matching.

EDUCATION

Master of Computer Applications (MCA) – Generative AI, SRM University, Chennai *Aug 2025 – Jun 2027*

(Expected)

Focused on Artificial Intelligence, Data Analytics, and modern computing technologies.

Bachelor's Degree in Computer Science, PSGR Krishnammal College for Women, Coimbatore *Aug 2022 – May 2025*

Graduated with 87%, with a strong foundation in programming and problem-solving.
